

Name: Goat Anti-Human C9
Catalog Number: A226
Sizes Available: 1.0 mL
Concentration: >40 mg/mL total protein concentration.
Extinction Coeff. $A_{280\text{ nm}} = 1.0$ at 1.0 mg/mL
Form: Frozen liquid, clear, yellow/tan colored.
Activity: 1/8 dilution versus NHS in immunodiffusion
1/32,000 effective concentration in Western Blots
1/64,000 effective concentration in ELISA.
Preservative: 0.09 % sodium azide.
Storage: -20°C or below (long term), +4°C (short term, <30 days)
Source: Goats (*Capra aegagrus hircus*) immunized with highly purified human complement protein.
Specificity: Monospecific for C9 in human plasma and serum.
Origin: Manufactured in the USA.

General Description

Product is whole polyclonal antiserum from goats immunized with highly purified human complement protein. Product is not a purified IgG fraction. Goats are maintained in FDA certified facilities.

Physical Characteristics & Structure

Antibodies present in the antisera are primarily IgG.

Applications

Western Blots: Effective at dilutions 1/16,000 to 1/32,000 depending on conditions. Note: Most effective against non-reduced antigen.

ELISA: Effective at dilutions 1/32,000 to 1/64,000 depending on conditions.

Immunodiffusion: Effective against NHS and plasma at 1/8 dilution

**FOR RESEARCH USE ONLY.
