

**Name:** Goat Anti-Human Factor H  
**Catalog Number:** A237  
**Sizes Available:** 1.0 mL  
**Concentration:** >40 mg/mL total protein concentration.  
**Extinction Coeff.**  $A_{280\text{ nm}} = 1.0$  at 1.0 mg/mL  
**Form:** Frozen liquid, clear, yellow/tan colored.  
**Activity:** 1/8 versus NHS in immunodiffusion  
1/32,000 effective concentration in Western Blots  
1/64,000 effective concentration in ELISA.  
**Preservative:** 0.09 % sodium azide.  
**Storage:** -20°C or below (long term), +4°C (short term, <30 days)  
**Source:** Goats (*Capra aegagrus hircus*) immunized with highly purified human complement protein.  
**Specificity:** Monospecific for Factor H in human plasma and serum.  
**Origin:** Manufactured in the USA.

### General Description

Product is whole polyclonal antiserum from goats immunized with highly purified human complement protein. Product is not a purified IgG fraction. Goats are maintained in FDA certified facilities.

### Physical Characteristics & Structure

Antibodies present in the antisera are primarily IgG.

### Applications

Western Blots: Effective at dilutions 1/16,000 to 1/32,000 depending on conditions. Note: Most effective against non-reduced antigen.

ELISA: Effective at dilutions 1/32,000 to 1/64,000 depending on conditions.

Immunodiffusion: Effective against NHS and plasma at 1/8 dilution
